KEY PROJECTS

- SOTI AI (Stella) | .NET, Azure OpenAI, Azure Speech Services
- Built .NET APIs to connect with Azure OpenAI for chat and speech-based queries.
 - Created a Windows service to enable local AI access using customer databases.
 - Used OpenAI to generate SQL from natural language and fetch real-time data for users.
- SOTI IdP | OAuth2/OIDC, LDAP directories, Entra ID, SAML
- Implemented SSO Identity Provider using Duende IdentityServer with Azure AD, LDAP, and custom group/role sync—ensuring seamless login across all SOTI Products.
 - Optimized performance and scalability to handle large user directories and directory syncs efficiently, reducing login latency and improving system responsiveness under heavy load.
- SOTI MobiControl | Microservice, Message Broker, SQL, Docker, Azure
- Built .NET microservices using REST, gRPC, and message brokers like RabbitMQ for async communication and distributed transactions.
 - Added OpenTelemetry for tracing and metrics; deployed services with Docker and automated CI/CD.
 - Adopted BDD with SpecFlow/Cherkin to drive feature development and ensure behavior-driven coverage.
- Light-Credit | NodeJs, MongoDB, Entity Framework
- Built a robust P2P lending MVP handling high-volume, unsecured loan transactions.
 - Applied basic fraud checks and validations to reduce risk in money transfers.
